RE: Evaluation of Reclamation Surety, Geneva Rock Products, Inc., Point of the Mountain (South Hansen) Quarry, M/035/0026, Salt Lake County, Utah

Dear Mr. Baker,

This is a response to your letter requesting updated surety calculations and bond for the above referenced Quarry.

We are presently in the process of obtaining a zone change and conditional use permit with Draper City for the eastern portion of the Quarry. This will allow us to expand the quarry into phase 2 of the mine. We have received approval from the Draper City Planning Commission for the zone change two weeks ago and now we go before the City Council in November for the final approval of the zone change. Then we will have to apply for the Conditional Use Permit with the Planning Commission. It appears to be quite a long process and we expect it will take at least until January or February to complete the process. We therefore would like to request a time extension to February 29, 2016 so that we can have all of the permits in place with the City to properly update our surety calculations and bond to fit our future mining plan.

We appreciate your consideration of the extension request.

Sincerely,

Brent R. Sumsion
Property and Environmental Manager
